

GitHub Commands to Upload Your Flask Website (code-cart)

1. Initialize Git in your project folder:

```
git init
```

2. Set your Git identity (only once):

```
git config --global user.name "Riddhiman Kumar"
```

```
git config --global user.email "yourusername@users.noreply.github.com"
```

3. Add all files:

```
git add .
```

4. Commit your files:

```
git commit -m "Initial commit"
```

(Optional) Fix author identity if needed:

```
git commit --amend --reset-author
```

5. Add your GitHub repo as a remote:

```
git remote add origin https://github.com/Riddiman108/code-cart.git
```

6. Push your code to GitHub:

```
git push -u origin main
```

(If push is blocked due to email privacy):

```
git push -u origin main --force
```

For future updates after changes:

```
git add .
```

```
git commit -m "Describe your changes"
```

```
git push
```
